

YOUR RELATIONSHIP WITH MONEY

FRICION - FREQUENCY - FAITH

Money is the greatest source of FRICTION for entrepreneurs

Is friction working for you or against you?

1. What is your primary thought about Money?

2. What is your primary feeling when it comes to Money?

Those two are the greatest indicators of your ability to create wealth.

Those must be positive, growth-focused, and full of gratitude and appreciation.

Negative thoughts and feelings come from EXPECTATIONS.

Positive comes from APPRECIATIONS.

So what are you not appreciating about your financial situation?

You do not have the amount of money you want. Thats fine

But a few questions...

Why do you want more money? Really?

What does the money you have done for you?

Here are two questions to better understand Financial Friction: our resistance and fears about money.

What is the worst thing that CAN happen to you financially?

What is the worst thing that HAS happened to you financially?

Are you willing to embrace friction and use it to your advantage instead of avoiding it?

Once you are willing to embrace friction, you will need Frequency and Faith.

Wealth and Money take risks, but the risk is not something we are comfortable with if we have not embraced frequency and faith.

YOUR RELATIONSHIP WITH MONEY

FRICITION - FREQUENCY - FAITH

How do we tune into the frequency of Money and bring Faith to our wealth?

Belief

Positive faith and belief in your ability to have, create, and make money is key to wealth. When you truly believe this positively, you are 10x more likely to take positive actions towards money, which will create MORE and WEALTH.

Consistency

Taking regular small actions daily is key to creating a brighter financial future. Doing something towards wealth and money daily in a positive way increases your confidence and abundance, which strengthens your actions and abilities over time.

Positivity

Having positive thoughts about money and your ability to create it flow through your head regularly is key. You should be focused on what is required to continue to feel abundance and success instead of allowing thoughts that bring limitation and scarcity.

Feel Rich

Rich is not an amount of money, it's a perspective and a feeling. It's a feeling of having a positive future with continued growth in money. Rich is a feeling you can have at any level of wealth. Tell yourself you are rich today. If you have running water, sunshine, a roof over your head, and access to your next meal, you are RICH already.

Trade Expectation for Appreciation

Negative money feelings come from having expectations for your money. Expectations are only valuable to allow judgment. Instead of expectations, try feeling more appreciation for what money has done for you and what it will do for you in the future.

Take a Risk

Once you have taken time with the above mindset and embodiment tactics, then risk is something you are already more comfortable with. Risk is how we create wealth. Risk is not optional, it is required for the highest levels of feeling wealth, success, and freedom.
